

January 18, 2023

The Second Street TIGER project is officially finished except for a few warranty activities that will occur this spring.

Pace Contracting completed the final work activities on Friday, January 13th. They have cleaned out and vacated the old Pic Pac Building. This site will be used to construct a new fire station.

As is prudent, the entire new storm drainage system was video inspected to ensure the infrastructure was operational. During this video inspection, there were a few locations identified that need to be cleaned out and a few locations that need to be repaired or replaced. In particular, there are two locations where Pace Contracting, at their expense, will remove and replace damaged drainage pipe. This work, along with other warranty items, will be accomplished this spring.

Two other warranty items include replacing any of the many plantings that may not have survived the winter and preparing the two irrigation systems for warm weather operations.

Again, we appreciate the patience and understanding the community has exhibited during this project. Thank you.
